ENGINEERS CONSIDER PREPAREDNESS TALK

(Associated Press)
CHICAGO, April 14.—A two-day conference of delegates from engineering societies from New England to California, representing the views of 100,000 men who are regarded as "Professional Engineers," began here today, being called by a get-together spirit that the recent agitation on the subject of preparedness has inspired, even among conservative professional men, notably electrical, mining and civil engineers.

Delegates from small and large engineering organizations—city, state and national—will discuss in detail large questions affecting all professional engineers and it is expected that the conference will result in a union that will effectively work for the general welfare of the profession.

The principal subjects to be discussed are the benefits of co-operation in securing greater efficiency; and the methods successfully followed in Philadelphia, St. Louis and other cities. Other questions to be discussed are:

Various kinds of engineering societies and committees and the relative efficiency of their operations; Relation of the specialized or exclusive national engineering societies to their local sections or branches and to the more inclusive local engineering society or club;

Result of co-operation in securing wider diffusion of knowledge on engineering subjects, as illustrated at Cleveland and elsewhere;

The engineering profession as a whole in its present condition as regards public esteem;

Reasons for decline in attendance at engineering colleges (Is it indicative of healthful conditions or of the proper methods of education?); Employment; methods and results as practiced by various engineering societies; an exchange of ideas;

Legislative activity, proper limits to be set, dangers to be avoided and needs of more systematic and better directed efforts.

MEXICANS ANGRY AT GUATEMALA METHODS

QUERETARO, Mex., April 14.—Reports of ill treatment of Mexicans in Guatemala have aroused public feeling in Mexico and the newspapers call upon the Carranza government to take action to protect Mexican citizens abroad.

El Pueblo, the official organ of the government, says: "Estrada Cabrera (president of Guatemala) is the sworn enemy of the constitutionalist government of Mexico. He worked against the interests of Mexico at the Niagara conference and is now imprisoning and beating our citizens in his realm, in ways as barbarous as those employed during the inquisition, for no greater crime than being followers of the constitutionalist movement. He has bought the yellow press of America in order to defame and insult our country. We call upon our authorities to take this matter in hand."
